AFTERCARE INSTRUCTIONS

POISE

ARTISTRY

A TIMELESS
LOOK

POISEARTISTRY.COM | @POISEARTISTRY

Aftercare Instructions

After the procedure, the area treated will be darker and more intense. This will last a few days until the skin heals, naturally exfoliates and the true color emerges. Brows will lighten 30-40%.

During the healing process you may develop dry, flaky and itchy skin around the treated area. This is completely normal. It is important not to rub, pick, or scratch this area.

Here's what you'll do...

GENTLY PAT YOUR BROWS

Every 10-minutes for the hour following your appointment to remove excess lymph fluid.

WASH + BALM

2X daily for the next ten days using the soap and ointment provided in your aftercare kit.

Wash hands and add 2 pumps of the soap and water mix to your fingertips. Lather, then lightly swipe 3X in the direction of your hair.

Cup your hands with water and rinse to make sure all soap is removed.

Pat dry with clean paper towel, or Kleenex.

Apply RICE GRAIN sized drop of ointment with a q-tip. It should not be goopy. One rice grain sized drop will cover BOTH brows*.

*DO NOT USE ONE DROP PER BROW.

The do-nots...

AVOID DIRECT WATER

For 10 days after procedure (other than wash + balm). This includes showering and pools.

AVOID SWEATING

No working out, no saunas or hot tubs for 10 days.

AVOID SUN EXPOSURE

This includes tanning beds. If you need to be in the sun, wear a hat and protect your brows for 10 days. The sun will strip your brows!

SLEEP ON YOUR BACK

While this might be difficult, for best results it is strongly advised to sleep on your back for 10 days. Sleeping on your sides could cause uneven healed results, or brows that will disappear.

AVOID TOUCHING

Do not touch your brows, pull, pick, or flick your scabs for the next 10 days. This will result in pigment loss and patchiness. As your new brows heal, you may notice some flaking and scabbing of your skin. This is completely normal.

LONGEVITY

Avoid products that include active ingredients, acne or anti-aging products, vitamin C, retinal. Anything that brightens or lightens should not be used on the brows. Sunscreen on the brows is advised after the full 10 days of healing. Keep face powder/foundation out of the brows at all times.

Zip, zero, zilch...

NO MAKEUP, LOTION, FACE WASH, SERUMS, SHAMPOO OR CONDITIONER

can touch your brows for the full 10 days.

For your health...

Client should consult a healthcare practitioner at the first sign of infection or an allergic reaction, and report any diagnosed infection, allergic reaction, or adverse reaction resulting from the tattoo to the artist and to the Texas Department of State Health Services, Drugs and Medical Devices Group, at 1-888-839-6676.

Use sterile bandage(s) or other sterile dressing(s) when necessary.
